Write your own procedure

- Why would you want to write your own procedure?

- What is another name for procedure?

How do you create a procedure?

Creating and Using procedures

- Where do you put the code for a procedure?

- How do you use new procedure? Where is it?
Suppose you want to edit a procedure

- If the tab is not there, how do you get it back up so you can edit it?

Object Movements

- Objects turn, roll and move different directions
- Parts can also turn and roll
- Parts not intended to be moved
- Helps if you understand the orientation of objects

Object Directions

- What direction are the arrows?
  - White
  - Blue
  - Red
  - Green

What about parts?
