The Story

• The panda bows a lot and the pig dances a lot. The pig does some movements and then moves off screen. The phoenix flaps its wings and flies away.

• Follow the steps below. You will need to write three procedures first. Then see a more detailed description of the story.

1) Setting up the scene

• Add in any ground cover, I used grassy desert
• Drag in these objects so they are in positions similar to the picture on the next page
  – Biped: Panda, Pig
  – Flyer: Phoenix

Starting Scene

• Use these camera controls to adjust
2) Write the panda **bow** procedure

- Make sure you create the procedure as a **panda** procedure

2) the panda **bow** procedure (cont)

- Add in a **do In Order**
- The panda should bow like this once:
  - Hint: use the part spineBase
- Test your bow by calling it from myFirstMethod

3) Write the **pig** procedure **dance**

- Here is how the pig dances
  - First move:
  - Then turns around once
  - Last move:

Test the pig dance procedure

- In myFirstMethod. Test the pig dance procedure
4) Write the phoenix procedure flapWings

- First in myFirstMethod, have the phoenix spread its wings. The phoenix must have its wings spread before you call flapWings.
- Then create the phoenix procedure flapWings
  - The phoenix flaps its wings once with three movements, both wings at the same time.
  - The total time for the flap is one second
  - See the pictures of the three movements next.

4) Phoenix flapWings (cont)

- Test flapWings in myFirstMethod

5) Now write myFirstMethod and the story

- First delete all the testing code in myFirstMethod, and then drag in a doInOrder.
- Here is the story to put in:
  - The panda bows, then faces the pig.
  - The pig dances, then the panda bows again.
  - The pig faces the panda, and the pig dances again.
  - Then the pig does the following movements:
**Story continued**

- Panda and phoenix turn and face each other at the same time.
- Then the phoenix spreads its wings, and then the panda bows.
- The phoenix flaps once, then flaps once while moving up in one second.
- Then the phoenix moves forward and off screen, flapping its wings several times at the same time.
- The panda faces front, bows and says “the end”
